CAREER OBJECTIVE

A motivated developer with a passion for building applications using JavaScript and blockchain technologies. Currently, I'm focused on building web applications using Reactjs, Express, MongoDB, Node, Solidity, etc. I'm also working on open-source projects in my free time, which can be seen on my [GitHub](#) profile.

WORK EXPERIENCE

1. Raahee : Web Development Intern

- Developed Admin panel and event booking application integrated with a payment gateway using ReactJs and NodeJS.
- Designed and developed a responsive user interface of the admin panel for the mental health professional.

2. AkristDigitized : Web Developer(Part-time)

- Ensured the best possible performance, quality and responsiveness of applications.
- Designed and developed visually pleasing, content-rich, user-friendly interfaces with intuitive navigation.
- Created web applications and components from the requirements stage, through design, through production deployment.

PROJECTS

Pras-Kit

NextJs,TailwindCss,Typescript

Pras-Kit is an open-source developer kit. It is a collection of React components, templates, and much more for making the development process faster.

Peep-Peep

NextJs,TailwindCss,Typescript,Firebase,Recoil

Peep-Peep is a Real-time social media application where a person can log in and post images, and textual content with emojis and other people can react to it and comment on it. It is made using Nextjs, Firebase, Tailwindcss, Recoil and NextAuth with Server-side Generation and Server-side authentication with server-side session creation.

A-lab

NextJs,TailwindCss,Typescript,Node-Js,React.Js,Express,FireBase

Virtual Platform designed to develop your engineering skills through lab work . Through this approach, Virtual Lab aims to ease the learning process by involving students in practical activities.

ETM

NextJs,TailwindCss,Typescript

ETM is an electric bike company. We developed a web application for them with booking the bikes pre-release and used many new technologies along with payment gateway integration.

Cryptohood

Next.Js,TailwindCss,Typescript,Solidity,Web3.Js

Cryptohood is a Cryptocurrency trading platform where anyone can transfer their asset or currency to another currency using Moralis, Alchemy and Metamask. Smart contracts are written in solidity powered by OpenZeppelin standards. Sanity is used as a CMS for storing all the transactions.
